

# PAWNEE TEAM

## READING – Mrs. Duree

We will be focusing on comparing written works to performance pieces. This will include a written assignment with every comparison. We will read a variety of stories to achieve this objective. I have really enjoyed my classes this year. You are a great group of parents to have such a great group of students. Thanks for all of your support and help in educating your child. Academically they are among the brightest students I have had at DCMS. They have also been a compassionate group. I lost both of my parents this school year and my students have helped me work through the grief. They let me cry when I needed to and cheered me up the next day. Thanks for letting me be a part of their lives. Have a great summer. Keep reading!

## LANGUAGE ARTS – Mr. Couch

We will continue to work hard and refine our writing. We will be working on writing skills that will help us in all classes at the high school.

## SCIENCE – Mrs. Hiers

Students will understand that in complex organisms there is a division of labor into specific cellular body systems such as reproductive, skeletal and digestive systems. Please visit with your child regarding any reproduction information that you may wish them to understand during our reproduction studies. Take time to visit with them about their birth day. It has been a true JOY to be part of your child's learning this past year. This has been the very best group of science students in my 20 years of at DCMS. We all know that genuinely caring people are the product of thoughtful parenting. You are wonderful . . . and so are your children.

Best Wishes to each of you! ☺ BIG HUGS! – Mrs. Hiers

## SOCIAL STUDIES – Mrs. Ramos

We have had a fantastic year with our 8<sup>th</sup> graders! Thank you parents for being so involved and caring. It has truly been a privilege to share knowledge with these amazing students. We will finish our year with the issue of Reconstruction (after the Civil War) and how it divided our government. Have a great summer and thank you again!
